This is our new home, how do you like it?
Look inside—you will be interested.

ALPHA DELTA

CORTLAND STATE NORMAL SCHOOL
CORTLAND, NEW YORK

THE NEW HOME OF THE ALPHA DELTAS

LOCATION

Most desirable location in city, on Normal Hill, facing the State Normal Park, within two short blocks of Cortland State Normal School, the choicest location for any possible sorority home. This location will make our home a part of the Normal campus itself, a feature of great value and much to be desired. From this home one looks down upon the Crown City from which emerge seven peaceful valleys.

CHARACTER

The new English type of unusual character will lend dignity to this home as a sorority house.

Public buildings such as our Cortland State Normal School have character; this, as our sorority home, will harmonize in a very pleasing way. It will be a great asset for our members to be able to look with pride upon our "home," as one of which they can justly be proud, one which they can look upon thirty or forty years from now and say, "It looks just as substantial and even more beautiful than it did when we were given the opportunity to pledge." It seems that a sorority home is a "semi-public" building and as such should receive very serious consideration as to its quality and character.

PERMANENCE—LOW COST UP-KEEP

The construction of the house makes it one which can have practically no depreciation and there is negligible cost of exterior painting. The house is built so substantially that the cost of heating is very low. As only the best of materials have been used throughout, the depreciation will be very low.

FEATURES

The home is constructed of brick and stucco with half-timbered work, slate roof, copper steel casement windows, heated by vapor heat. Spacious hall, large living room with fireplace, dining room and veranda are so arranged that all can be used as a unit for large meetings and functions. The two bathrooms on second floor are fully tiled, one containing a built-in shower; in addition there are two lavatories.

Dormitory rooms are so arranged that no girls will be crowded and there will be unusual advantages in the large second floor living room. Due consideration has been given to rooms for study. Our home will comfortably accommodate forty girls.

On the first floor you will find a library where the Club Mother may be found to guide and direct. The girls will find real pleasure in using the complete and thoroughly equipped laundry room in basement. This home contains practically every conceivable convenience known in the form of labor-saving devices; its appointments effect a very happy surrounding. The lot is very large and beautifully landscaped.
